

Bandit 3-4

Bandit Level 3 → Level 4

Level Goal

The password for the next level is stored in a hidden file in the `inhere` directory.

Commands you may need to solve this level

`ls`, `cd`, `cat`, `file`, `du`, `find`

The Objective for the bandit3 lab is to find a hidden file in a directory called `inhere`. So through this we can know that we need to enter a directory which uses the `cd` command, then find the hidden file using `ls` command, once we find the file we will use the `cat` command to read the content.

```
bandit3@bandit:~$ ls
inhere
bandit3@bandit:~$ cd inhere/
bandit3@bandit:~/inhere$ ls
```

We list the files and found that the directory is highlighted in blue, we `cd` into the directory but once we list the file again there is no file in the directory, that is because the file is hidden. We then use `ls -a` which the “`-a`” stands for all, including hidden files.

```
bandit3@bandit:~/inhere$ ls -a
. .. ... Hiding-From-You
```

Now that we have found the file, we will read the content using `cat`.

```
bandit3@bandit:~/inhere$ cat ... Hiding-From-You
2WmrDFRmJIq3IPxneAaMGhap0pFhF3NJ
```

The password for the login to bandit4 is `2WmrDFRmJIq3IPxneAaMGhap0pFhF3NJ`.
